

Dear home resident;

Thank you once again for the opportunity to have provided an expert home inspection to your residence or apartment. As a certified member of InterNACHI (National Association of Certified Home Inspectors), I take great pride in performing a complete and certified home inspection that follows important criteria and quality standards.

My most recent certification as a fire safety inspector certified by the National Association of Fire and Safety Training enables me to add fire safety inspection services to my offering.

Did you know?

- 81% of loss of life in a fire occurs in a residential setting.
- \$7 billion dollars are lost each year on property damage due to fires.
- Only 23% of these properties had working smoke detectors.

I have joined the NIFAST organization as a certified professional to bring this important life-saving service to my customer base and help NIFAST achieve their mission to reduce the loss of life, injury, and property damage due to fire.

Is your home fire safe? Ask yourself these important questions:

- Is your fire safety equipment up-to-date?
- Do you have kitchen fire safety equipment and safe practices?
- Are your home residents educated on fire safety standards and safe practices?
- Do you wish to dramatically improve your home fire safety profile?

These are just a few of the important questions that will be answered through a complete fire safety inspection.

What does a NIFAST certified inspection provide homeowners?

- Education and recommendations on home fire safety requirements
- The opportunity to understand and correct potential fire risks in your home.
- Key reminder dates for essential fire safety products in your home.
- An improved fire safety profile.
- Tips for locating and acquiring fire safety equipment through our online safety store.

I am interested in performing a fire safety inspection in your home in the near future. I know this inspection will be helpful, educational and eye-opening as to certain vulnerabilities within your home.

The complete fire inspection takes about one hour. Please call me for more information. I look forward to your positive response.

Sincerely,

Joe Home Inspector
NIFAST/InterNACHI Certified Home Inspector
